

South West Ambulance Service

Defibrillator Information

We provide a 4 year fully supported scheme which I have outlined below and contacts relating to other schemes.

We would provide a G5 defibrillator and external unlocked cabinet for a 4 year period, to allow 24 hr access. We would replace any consumables used such as electrode pads and battery. In the event of the AED developing a fault or misplaced we would replace it. We would also provide an annual awareness session, at a venue that the site can provide. The cost of this is £1800 not including VAT for the total 4 year period payable in advance. In the event of the AED being used we would also offer post follow up to the rescuer. We would need whoever is the guardian responsible for checking the AED to submit a monthly online report confirming checks. This is nothing more onerous than 3 tick box questions. It would be the responsibility of the community to arrange installation with an electrician.
